June 9, 1976

TO: All Distributors

FROM: Airtech International, Inc.

SUBJECT: Release-All 100 (*new Indy shows superseded by Release-All 30*)

1. We have changed the solvent system in Release-All 100 so it is no longer a red label item. The release characteristics are exactly the same as the solids stay identical. It will not be necessary to offer Release-All 100 HM as now Release-All 100 does everything.
2. Enclosed is our new data sheet showing this change. Now, air shipments will not be a problem on this product. The high flash solvent is more costly but Airtech is absorbing this cost at present so there is no price change.
